

SCIENCE ON STAGE

Teachers make the difference!

Science on Stage Europe aims to improve STEM education in Europe by supporting and encouraging them in their professional development and growth. As an umbrella organisation, we support 34 member countries in realising their activities. The ultimate goal is to promote a more scientifically literate population. And to encourage students to consider a career in science, IT and engineering. True to the motto "Teachers make the difference".

WHO WE ARE

- a non-profit educational initiative that puts the spotlight on STEM
- Europe's biggest network for STEM teachers focusing on the exchange of best practice and teaching ideas

WHAT OUR GOALS ARE

- enabling teachers to exchange teaching concepts and experiences
- motivating teachers by providing a platform for their ideas
- connecting teachers and thereby facilitating new projects
- supporting teachers in their continuous professional development
- giving teachers the opportunity to present their teaching ideas throughout Europe

WHAT WE DO

- organize national and international educational festivals
- develop free teaching materials in several languages
- implement teacher trainings and international teacher exchange programmes

HOW SCIENCE ON STAGE WORKS

Many teachers have great teaching ideas to excite students for STEM. The activities of Science on Stage ensure that innovative projects find their way into classrooms all over Europe. Therefore, Science on Stage Europe organises Europe's biggest educational festival from and for STEM teachers. The participating teachers are selected through competitive national events in the member countries. The Science on Stage festivals are the core of our network, since they are the starting points for a wide range of national follow-up activities.

At the Science on Stage festivals, dedicated STEM teachers from all over Europe come together to exchange their ideas. This **networking** is followed by **international teacher exchanges** and the possibility of **submitting a joint project** for a future festival.

Science on Stage regularly organises **practical teacher trainings** throughout Europe based on festival projects, festival follow-up activities and international teacher projects. Our lecturers have previously taken part in one of our festivals with a project or worked on our teaching materials.

Science on Stage offers **teaching materials** developed by European STEM teachers for STEM teachers. In **international teams**, they develop teaching concepts and ideas to be published as teaching materials in **several languages**.
