

The European Science Teachers' Network

**FROM
TEACHERS
FOR
TEACHERS**

Science on Stage Europe brings together science teachers from across Europe to exchange best practice and teaching ideas and concepts with passionate colleagues from over 30 countries. Science on Stage Europe believes that the best way to improve science teaching and to encourage more schoolchildren to consider a career in science or engineering is to motivate and inform their teachers. The non-profit organisation was founded in 2000 and reaches 100,000 teachers Europe-wide. **The countries involved are:**

Activities

Science on Stage festival

Every two years Science on Stage Europe organises Europe's biggest science teaching festival. Teachers from all over Europe exchange their ideas, projects and methods at stands, in workshops and on stage. These ideas are afterwards spread throughout Europe via follow-up activities:

Teacher training

The Science on Stage countries organise teacher training events involving an international project and a national festival project.

Travel scholarships

Teachers from different countries who participated in the festival can meet again to continue their work and to develop joint projects.

International projects

Working groups of international teachers develop materials for their colleagues in Europe. Science on Stage publishes these concepts, which can be ordered or downloaded for free.

Teaching materials

Science on Stage publishes teaching materials developed by teachers for teachers in different languages and spreads them across Europe.

Teaching materials

Science on Stage offers teaching materials developed from European STEM teachers for STEM teachers. All materials are free of charge and can be downloaded here:

www.science-on-stage.eu/teachingmaterials

Science on Stage inspires teachers, but how exactly do teachers profit from taking part?

90 % of participating teachers **have incorporated ideas that were presented at Science on Stage events into their own lessons.**

90 % of participating teachers **have conducted teacher training activities based on learning from Science on Stage and thus functioned as multipliers.**

92 % of the participants **established international contacts; over 55 % of them made at least four good contacts.**

Over 77 % of the participants **rate the sustainability effect of the festival as high; 73 % of them stated to apply also for the next festival.**

The participant survey took place before, during and eight months after the Science on Stage festival 2019. Evaluation study 2019 carried out by Dr. Tanja Tajmel and Dr. Ingo Salzmann, Concordia University Montréal.

Supporters

Science on Stage Europe is mainly supported by the federation of German employers' associations in the metal and electrical engineering industries (GESAMTMETALL) with its initiative think ING.
