

# Air pollution

## Research questions

1. How have the emissions of carbon dioxide in our country developed and can they be reduced further?
2. Compare the CO<sub>2</sub> emissions of our country with those of the rest of the world. Which country emits the most CO<sub>2</sub>?
3. Compare our country's annual CO<sub>2</sub> emissions to the consumption-based CO<sub>2</sub> emissions. How have they developed?
4. China has the highest CO<sub>2</sub> emissions in total. How high are China's CO<sub>2</sub> emissions per person and how have they developed?
5. Collect the data as you did in the previous activities for other countries and compare them with each other.  
Selected countries: Spain, Portugal, Greece, Germany, Ghana  
Chart study period: 1800-2020
