

AI in STEM Education – 10 March 2026

Free Webinar for Primary and Secondary STEM Teachers

10 March 2026 | 4.30 – 5.30 p.m. (CET)

Speakers: Liliana Fernandes & Cláudia Meirinhos, primary school teachers in Portugal

A thoughtful and well-informed approach to artificial intelligence is becoming increasingly essential in education. But how can we help students understand the basic principles, opportunities, and risks of AI? And how can we actively engage and motivate them to develop AI-related skills?

In this webinar, our speakers will share practical, hands-on approaches to integrating AI into STEM education. Participants will be introduced to ready-to-use classroom materials, including the 'EcoKids Teach AI' resources available on our website, as well as additional tools, examples, and tips designed especially for beginners.

Registration: Please register via [this link](#) or use the code on the right:

Participation is free of charge. Certificates of participation will be issued.
