

The European Science Teachers' Network

**FROM
TEACHERS
FOR
TEACHERS**

Science on Stage Europe brings together science teachers from across Europe to exchange best practice and teaching ideas and concepts with passionate colleagues from over 30 countries. Science on Stage Europe believes that the best way to improve science teaching and to encourage more schoolchildren to consider a career in science or engineering is to motivate and inform their teachers. The non-profit organisation was founded in 2000 and reaches 100,000 teachers Europe-wide. **The countries involved are:**

Activities

Science on Stage festival

Every two years Science on Stage Europe organises Europe's biggest science teaching festival. Teachers from all over Europe exchange their ideas, projects and methods at stands, in workshops and on stage. These ideas are afterwards spread throughout Europe via follow-up activities:

Teacher training

The Science on Stage countries organise teacher training events involving an international project and a national festival project.

Travel scholarships

Teachers from different countries who participated in the festival can meet again to continue their work and to develop joint projects.

International projects

Working groups of international teachers develop materials for their colleagues in Europe. Science on Stage publishes these concepts, which can be ordered or downloaded for free.

Teaching materials

Science on Stage publishes teaching materials developed by teachers for teachers in different languages and spreads them across Europe.

Science on Stage Festival

The next European Science on Stage festival will take place from 28–31 May 2026 in Klaipėda, Lithuania. 450 primary and secondary school teachers from all over Europe will come together to share their most creative and innovative STEM ideas at stands, in workshops, and in highlight sessions. Participants will be selected via competitive national events in 2025 in over 30 countries.

Festival venue: University Klaipėda

Organisers: LINEŠA, Klaipėda University, Klaipėda STEAM Center, Ministry of education, science and sport of the Republic of Lithuania, Science on Stage Lithuania

In Corporation with: Science on Stage Europe

Science on Stage inspires teachers, but how exactly do teachers profit from taking part?

96 % of participating teachers **have incorporated ideas that were presented at Science on Stage events into their own lessons.**

85 % of participating teachers **have conducted teacher training activities based on learning from Science on Stage and thus functioned as multipliers.**

92 % of the participants **established international contacts; over 55 % of them made at least four good contacts.**

Over 89 % of the participants **rate the sustainability effect of the festival as high; 73 % of them stated to apply also for the next festival.**

The participant survey took place before, during and eight months after the Science on Stage festival 2022. Evaluation study carried out by Dr. Tanja Tajmel and Dr. Ingo Salzmann, Concordia University Montréal.
